

Environment & Sustainability

We have a proactive approach to environmental management which strives to anticipate and prevent potential environmental degradation. We are committed to comply with local, national, and international environmental regulations applicable to our operations and business services. Environmental considerations are integral to our operations, asset management and other business decisions in all markets.

We recognise that identifying and quantifying environmental risks should be part of the normal process of risk assessment and management.

With reference to our customers, we regard compliance with applicable environmental regulations and the use of sound environmental practices as important factors in demonstrating effective corporate management.

We are committed to minimising the environmental impact and pursue the best practice in environmental management including energy efficiency, travel, recycling and waste reduction. We will seek to form business relations with partners, suppliers, and subcontractors who follow similarly high environmental standards.

We review and update our practices periodically to incorporate relevant developments in environmental management. We recognise the need to conduct internal environmental reviews on a periodic basis, and to measure our activities against our environmental goals.

Our objectives are to:

- Avoid physically travelling to meetings where alternatives are available and eg teleconferencing, video conferencing or web cams.
- Reduce energy usage by employing utility providers who have sustainable practices and recycled energy.
- Implement new sustainable technologies where possible.
- Consider environmental criteria when choosing services and goods.
- Reduce our impact on the environment and encourage our employees, suppliers and clients to do likewise.

What we do:

- Provide recycling facilities for paper, printer toners, batteries, plastics etc.
- Where possible, reuse, reduce and recycle.
- Installation of Solar Panels
- Use appropriately licensed organisations to remove and where possible recycle IT and electronic equipment in accordance with WEEE regulations.
- Provide teleconferencing facilities.
